INDEX OF SUBJECTS

Volume 27

July 1961 • December 1961

Journal of the National Cancer Institute and NCI Monographs

Adrenocorticotropin, effect of, and insulin on azo-dye carcinogenesis in hypophysectomized rats, 817
4′-Alkyl-4-dimethylaminoazobenzene(s), hepatocarcinogenicity of a homologous series of, 663
Aminofluorenol(s):
in vitro labeling of liver proteins by C^{14} from, 153
isomeric, urinary metabolites of *N*-2-fluorenylacetamide, 145
Announcements:
Council for Medical Communication Institute, 485
Eleanor Roosevelt International Cancer Fellowships, 237
Manuscripts Approved for JNCI, 238, 486, 711, 935, 1225, 1259
National Cancer Institute Monograph No. 6, 485
Second International Congress of Radiation Research, 1224
Sixteenth Annual Symposium on Fundamental Cancer Research, 1224
Symposium on Basic Problems in Neoplastic Disease, 935
Antibody(ies), to rat hepatomas, *in vivo* localization in hepatoma versus normal liver, 1107
Antigen(s) *see also* Antibody; Immunity studies
cytotoxicity of anticancer serum against human cancer cells, 487
relationship of muscle tumors to normal skeletal muscle cells, 937
Ascites tumor(s) *see also* Lymphoid tumors
vacuolization by polysaccharide, 1115
Azo dyes, effect of adrenocorticotropin and insulin on carcinogenesis by, in hypophysectomized rats, 817

Bladder *see* Survival rates
Blood:
circulating tumor cells in rat, 17
flow of, in hepatomas and other tumors in rats and mice, 1465
γ-globulins in serums, from patients with multiple myeloma, 973
Bone *see also* Mortality rates
———marrow, homologous and autologous grafts in X-irradiated monkeys, 53
Brain and nervous system *see* Mortality rates
Breast *see* Mortality rates; Survival rates
Buccal cavity and pharynx *see* Mortality rates

Cancer *see also* Mortality rates; Names and types of tumors; Survival rates
all sites, NCI Monogr. No. 6, 137
chromosomal character of cells in, 893
end results in, NCI Monogr. No. 6, 6
etiology of, lack of oncogenic effect of a rat virus, 221
mortality tends in United States, 1930–55, NCI Monogr. No. 6, 131

Cancer—Continued
uterine, of mice, induced with methylcholanthrene and diethylstilbestrol, 611
Carbohydrate, metabolic enzymes, in tumors induced by Rous sarcoma virus, 869
Carcinogenesis *see also* Names and types of tumors
chemical carcinogens,
azo dye, effect on substrate induction of trypotophan pyrrolase in rat liver, 1503
hepatocarcinogenicity of a series of 4′-alkyl-4-dimethylaminoazobenzenes, 663
metabolites of, in rats, 1451
nitrosamines, various, in the rat, 695
transplantable tumors induced in Syrian golden hamster by, 1323
dose thresholds in, 203
effect of,
adrenocorticotropin and insulin on azo-dye carcinogenesis in hypophysectomized rats, 817
Steel gene on, 443
mammary, by 3-methylcholanthrene, 333
parameters in induction of mammary tumors in rats, 503
"safety" testing of carcinogens, 455
of uterine cervix in mice, 611
Carcinogens *see* 4′-Alkyl-4-dimethylaminoazobenzene; Aminofluorenol; Dibenz[*a*,*h*]anthracene; *N*-(2,7-dihydroxy-3-fluorenyl)acetamide; *N*-2-fluorenylacetamide; *N*-3-fluorenylacetamide; *N*-(7-hydroxy-3-fluorenyl)-acetamide; Methylcholanthrene; 3′-Methyl-4-dimethylaminoazobenzene; Urethan
Cell(s):
ascites tumor, vacuolization by polysaccharide, 1115
ependymoma, infection by Theiler's virus in tissue culture, by electron microscopy, 793
exfoliative, photometric measurements on fluorochromed cervical, 311
HeLa, response to X irradiation, 1393
intranuclear inclusion, in *Rattus* (Mastomys) *natalensis* infected with rat virus, 1217
proliferation in precancerous liver, as function of time and dose of carcinogen, 827
Cell(s)—Continued
surface, of mouse omentum, studied by phase-contrast and electron microscopy, 713
viable single, suspensions, from solid tumors, 841
Central nervous system, tumors of, in rat, 1037
Cervix, cancer of:
deaths among 5-year survivors, 239
polyp of, in Sprague-Dawley rat, 1037
Chemotherapy, inhibition of human tumor tissue by drugs, evaluation by an *in vitro* test, 807
Chromosomes *see also* Genetics
abnormal, in chronic granulocytic leukemia in cancer patients, 1013
in acute leukemia in children, 983
changes induced in, by 5-bromodeoxyuridine, 514
in effusions of cancer patients, 893
Cigarette smoke, effect upon ciliated mucus-secreting epithelium of frog esophageal tract; protective effect of parasympatheticomimetic agents, 1379
Cirrhosis and liver tumors, effect of hormones on production of, 559
Connective tissue *see* Mortality rates
Cortisone, effect on organ cultures of skin, 1285

Death rates *see* Mortality rates
Deoxyribonucleic acid, content, in cells of primary and metastatic mouse mammary tumors, 217
Diagnosis, plasma-enzyme levels in hamsters with mammary adenocarcinoma, 1145
Dibenz[*a*,*h*]anthracene, lung tumors in mice induced by, 203
Diet(s):
dietary carcinogens, possible influence on induction of hepatoma in trout, 1123
irradiated food in, effect on rats, 1037
Digestive system *see* Mortality rates
N-(2,7-Dihydroxy-3-fluorenyl)acetamide, synthesis of from 7-methoxy-2-fluorenamine; excretion of in rat urine after administration of *N*-3-fluorenylacetamide, 1451

Electron microscopy:
of surface cells of mouse omentum, 713
Theiler's virus in ependymoma, virus-like bodies seen by, 793

End results in cancer, NCI Monogr. No. 6, 6
Endocrinology:
effect of deoxycorticosterone, corticosterone, and somatotropin on mammary-tumor development, 173
hormonal action on mammary glands in mice, 187
mammary-tumor development with ovarian grafts, 333
Enzyme(s):
adaptive, tryptophan pyrrolase, effect of azo-dye carcinogen on, in rat liver, 1503
carbohydrate metabolic, in tumors induced by Rous sarcoma virus, 869
hyaluronic acid and hyaluronidase production in tissue culture, 543
plasma, in hamsters with mammary adenocarcinoma, 1145
Epidemiology:
simple and radical mastectomy for breast cancer, analysis of Rockford data, 1197
site distribution in husband-wife and sibling pairs, 875
Epithelium:
ciliated mucus-secreting, of frog esophageal tract, effect of parasympatheticomimetic agents on, 1379
dependency of flank-organ tumor of hamster on hormones, 1493
Esophagus *see* Survival rates

Fatty acids, in human mammary carcinoma, 25
Fish hepatoma, in rainbow trout, 1123
N-2-Fluorenylacetamide:
aminofluorenols as urinary metabolites of, 145
9-C^{14}, and related compounds, liver protein labeling by, 153
cell proliferation in liver of rats fed, 827
effect of hormones on development of carcinoma and cirrhosis of liver in rats produced by, 559
N-3-Fluorenylacetamide, new metabolites of, in rats, 1451
Folic acid antagonists, effect on homograft response, 259

Gastrointestinal tract *see also* Gastrointestinal-tract tumors; Stomach
histochemical studies of, 949
Gastrointestinal-tract tumors, spontaneous, in Sprague-Dawley rats, 1037
Genetics *see also* Chromosomes
effect of,
elimination of, A^{w} gene on lung tumors, 1189
Steel gene on teratocarcinogenesis, 443
Gm factors in serum γ-globulin fractions, 973
inheritance of resistance to Rous sarcoma virus, 655
resistance to grafted mouse tumors, influence of constitution on, 1069
Genital organs, female and male *see* Mortality rates
Glucose, isotope studies of metabolism of, by Rous sarcoma virus-induced tumors, 863
Glucuronidase, of cultured cells derived from C3H mouse liver, 667
Grafts *see also* Transplantation
of bone marrow in X-irradiated monkeys, morphology of, 67
homografts,
and autografts of bone marrow in X-irradiated monkeys, 53
lymphocytic cells in destruction of homologous cells *in vitro*, 471
response, effect of folic acid antagonists, 259
survival of skin, ovaries, and tumors across histocompatibility barriers, 351

Hemangioendothelioma, tumor of oviduct in Sprague-Dawley rat, 1037
Hematoporphyrin, intracellular localization in transplanted tumor, 1369
Heparin, effect of, on Walker 256 cells in rat, 17
Hepatoma(s) *see also* Liver tumors
autochthonous in rats, *in vivo* localization of antihepatoma antibody in, 1107
β-glucuronidase activities in mouse, 667
in rainbow trout, 1123
Hexachlorotetrafluorobutane, lung carcinoma in rats, 375
Hodgkin's disease *see* Survival rates
Hormones *see also* Adrenocorticotropin; Insulin; Testosterone
in carcinogenesis of mammary glands by 3-methylcholanthrene, 503
effect of,
on carcinogenesis by *N*-2-fluorenyldiacetamide in rat liver, 559
derivatives of, on mammary tumors induced by methylcholanthrene, 1173

Hormones—Continued
in liver carcinogenesis, 817
tumors induced by, flank-organ epithelioma of the Syrian hamster *in vitro*, 1493
Hydrocarbons (carcinogenic), lung tumors induced in rats by hexacholorotetrafluorobutane and methylcholanthrene, 375
N-(7-Hydroxy-3-fluorenyl)acetamide, synthesis of from 7-methoxy-2-fluorenamine; excretion of in rat urine after administration of *N*-3-fluorenylacetamide, 1451

Immunity studies:
antigenic relationship of muscle tumors to normal skeletal muscle cells, 937
cytotoxicity of horse antihuman cancer serum, 487
effect of serums on human cells *in vitro*, 1
homograft tolerance in radiation chimeras, 1059
isoantigenic systems, in mice, study of, *in vivo*, 1069, 1095
tolerance to tumor transplants, in parous females, 409
Inclusion bodies, viral, with a rat virus, 221
Infancy and childhood *see* Mortality rates
Insulin, effect of, and ACTH on azo-dye carcinogenesis in hypophysectomized rats, 817
Irradiation, of polysaccharide by electrons with consequent loss of capacity to induce vacuolization in ascites tumor cells, 1115

Kidney *see also* Survival rates
transplantation of tumors into host-isolated, 679
Kidney tumors, carcinogonesis with dimethylnitrosamine, 695

Large intestine *see* Survival rates
Leukemia, Lymphatic, Monocytic, and Myeloid *see also* Lymphoid tumors; Mortality rates; Survival rates; Virus
acute, in children, chromosome studies in, 983
chronic granulocytic, abnormal chromosomes in cancer patients, 1013
failure of bone marrow to interfere with augmentation by urethan, 1361
in vitro culture of X-ray and viral-induced cells of, 1153
Leukemia—Continued
incidence in mice with thymic transplants, 277, 299
murine types, electron-dense particles in, 747
Liver:
cell proliferation in, induced by carcinogen, 827
enzyme activities in cultured cells from mouse, 667
rat,
abnormal mitotic figures in, after X irradiation and partial hepatectomy, 131
in vivo reactions with antihepatoma antibody, 1107
protein-binding of *N*-2-fluorenylacetamide and related compounds in, 153
Liver tumor(s) *see also* Hepatomas
blood flow in, and in other tumors, 1465
carcinogenesis with dimethyl- and diethylnitrosamine, 695
effect of hormones on induction of, by *N*-2-fluorenyldiacetamide, 559
induced with 4′-alkyl-4-dimethylaminoazobenzene, 663
Lung *see also* Survival rates
infarcts and carcinomas of, in rats, 375
Lung tumor(s):
elimination of effect of A^v gene on, 1189
induced by,
chemicals, in mice, 203
dimethylnitrosamine, 695
reduction of, after primary amputation, 1311
spontaneous human, classification and incidence of, 1227
Lymphoid tissue, lysis of homologous cells by lymphocytes *in vitro*, 471
Lymphoid tumors *see also* Ascites tumor; Leukemia
electron-dense particles in murine types of, 747
Lymphomas *see* Mortality rates
Lymphosarcoma and reticulosarcoma *see* Survival rates

Mammary gland(s), effect of hormones on hyperplastic nodules in mice, 187
Mammary tumor(s):
carcinogenesis by 3-methylcholanthrene in Wistar rats, and hormonal effects thereon, 503

Mammary tumor(s)—Continued
content of deoxyribonucleic acid in cells of primary and metastatic mouse, 217
development of,
from hyperplastic nodules in mice, 173
with 3-methylcholanthrene and ovarian grafts, 333
fatty acids in, 25
induced by methylcholanthrene, effect of enol-ether derivatives of dihydrotestosterone on, 1173
in milk-agent-free mice, after transplantation of pituitaries in, 1273
simple and radical mastectomy, analysis of data, 1197
spontaneous, incidence in Sprague-Dawley rats, 1037
transplanted, in hamster, effect on plasma enzymes, 1145
Mammary-tumor agent, mice free of, transplantation of pituitaries in, 1273
Melanoma of skin, survival of patients with, NCI Monogr. No. 6, 69
Metabolism:
glucose, in Rous sarcoma, 597
of single cell suspensions from solid tumors, 841
Metabolites, aminofluorenols as, of *N*-2-fluorenylacetamide, 145
Metastasis:
chromosome character of cells in effusions, 893
content of deoxyribonucleic acid in cells of primary and metastatic mouse mammary tumors, 217
of transplanted animal tumors, 1311
3-Methylcholanthrene:
in carcinogenesis,
determination of "safe" doses, 455
of mammary tumors in Wistar rats, 503
deposition of, in areas of pulmonary infartion, 375
and diethylstilbestrol effect on mouse uterus, 611
effect of hormone derivatives on induction of rat mammary tumors by, 1173
3′-Methyl-4-dimethylaminoazobenzene, effect on substrate induction of tryptophan pyrrolase activity in rat liver, 1503
Microscopy, light, phase, and fluorescence, of polyoma virus, 99
Mitochondria, in cells infected with H-1 virus, electron microscopic study of, 1405
Mitosis:
abnormal, in rat liver, after X ray and partial hepatectomy, 131
frequency in human gastric mucosa, from patients with ulcers and cancer, 949
Monkey, morphologic alterations after X irradiation, marrow transplantation, and recurrent infection, 67
Mortality rates:
age-adjusted, selected sites, NCI Monogr. No. 6, 347
for cancer of,
all sites, NCI Monogr. No. 6, 137
bone, NCI Monogr. No. 6, 278
brain, NCI Monogr. No. 6, 267
breast, NCI Monogr. No. 6, 225
buccal cavity and pharynx, NCI Monogr. No. 6, 151
connective tissue, NCI Monogr. No. 6, 278
digestive system, NCI Monogr. No. 6, 162
female genital organs, NCI Monogr. No. 6, 239
in infancy and childhood, NCI Monogr. No. 6, 291
leukemia, NCI Monogr. No. 6, 279
lymphomas, NCI Monogr. No. 6, 286
male genital organs, NCI Monogr. No. 6, 232
respiratory system, NCI Monogr. No. 6, 214
skin, NCI Monogr. No. 6, 262
thyroid gland, NCI Monogr. No. 6, 276
urinary organs, NCI Monogr. No. 6, 250
cancer, United States,
1930–55, NCI Monogr. No. 6, 300, 324
1930–32 and 1954–56, NCI Monogr. No. 6, 338
estimated populations by age, sex, and race, United States, 1930–55, NCI Monogr. No. 6, 346
Mortality trends *see* Mortality rates
Myeloma(s), multiple *see also* Survival rates
serum γ-globulin, from patients with, 973

Neoplasm, mast-cell, biochemical and morphologic heterogeneity, 1341

Omentum, of mouse, studied by phase-contrast and electron microscopy, 713
Ovarian tumor(s), teratomas, genetic and environmental effects on incidence of, 443
Ovary *see also* Survival rates
transplantation of tumors into host-isolated, 679

Parasympatheticomimetic agents, protective effects on ciliated mucus-secreting epithelium, 1379
Plasma *see also* Blood
enzyme levels, in hamsters with mammary adenocarcinoma, 1145
Polysaccharide, goldenrod, inactivation by electron radiation of the capacity to induce vacuolization in ascites tumor cells, 1115
Pregnancy, effect of, in the transplantation of neoplasms to parous female mice, 409
Prostate *see* Survival rates
Proteins, of rat liver, labeling by C^{14} from *N*-2-fluorenylacetamide and related compounds, 153
Pyruvic acid, metabolism in Rous virus-induced tumors, 863

Rectum *see* Survival rates
Respiratory system *see* Mortality rates
Rous sarcoma *see* Virus

Salivary gland *see also* Survival rates
spontaneous sarcoma of, in rat, 1037
viral inclusion bodies without development of neoplasms, 221
Serum, effect of, on human cells *in vitro*, 1
Sex, site distribution in husband-wife and sibling pairs, 875
Skin *see also* Mortality rates; Survival rates
effect of cortisone on organ cultures of, 1285
malignant melanoma of, survival of patients with, NCI Monogr. No. 6, 69
Smoking (tobacco)
——— habits, in the United States, statistics on, 419
Spleen, intrasplenic transplantation of neonatal thymus, 277, 299
Statistics, cancer:
analysis of data on simple and radical mastectomy, 1197
lung, incidence of, as revealed at necropsy, 1227
site distribution in husband-wife and sibling pairs, 875
smoking habits in the United States, 419
testing of carcinogens, 455
uterine, Connecticut, deaths among 5-year survivors, 239
Stomach *see also* Gastrointestinal tract; Gastrointestinal-tract tumors; Survival rates
mucosa, mitotic activity in human surgical specimens, 949
Survival rates:
follow-up of lost patients, NCI Monogr. No. 6, 123
of patients with cancer of tongue, NCI Monogr. No. 6, 85
of patients with malignant melanoma of skin, NCI Monogr. No. 6, 69
relative, statistical methodology, NCI Monogr. No. 6, 101
trends in, of cancer patients in Connecticut and California, NCI Monogr. No. 6, 49
for white cancer patients, NCI Monogr. No. 6, 6
1-year, for white patients with cancer of,
lymphatic leukemia—acute, NCI Monogr. No. 6, 45
monocytic leukemia, NCI Monogr. No. 6, 46
myeloid leukemia—acute, NCI Monogr. No. 6, 45
5-year, for white patients with cancer of,
bladder, NCI Monogr. No. 6, 29
female breast, NCI Monogr. No. 6, 21
Hodgkin's disease, NCI Monogr. No. 6, 35
kidney, NCI Monogr. No. 6, 28
large intestine, NCI Monogr. No. 6, 14
lymphatic leukemia—chronic, NCI Monogr. No. 6, 36
lymphosarcoma and reticulosarcoma, NCI Monogr. No. 6, 35
multiple myeloma, NCI Monogr. No. 6, 36
myeloid leukemia—chronic, NCI Monogr. No. 6, 37

Survival rates—Continued
5-year, etc.—Continued
ovary, NCI Monogr. No. 6, 27
prostate, NCI Monogr. No. 6, 27
rectum, NCI Monogr. No. 6, 15
salivary gland, NCI Monogr. No. 6, 9
skin,
basal-cell carcinoma, NCI Monogr. No. 6, 33
epidermoid carcinoma, NCI Monogr. No. 6, 32
melanoma, NCI Monogr. No. 6, 30
stomach, NCI Monogr. No. 6, 12
testis, NCI Monogr. No. 6, 28
thyroid gland, NCI Monogr. No. 6, 34
tongue, NCI Monogr. No. 6, 8
uterine cervix, NCI Monogr. No. 6, 21
uterine corpus, NCI Monogr. No. 6, 23
uterus, NOS, NCI Monogr. No. 6, 25
5- and 1-year, for white patients with cancer of,
bronchus and lung, NCI Monogr. No. 6, 16, 40
esophagus, NCI Monogr. No. 6, 10, 38

Technique(s):
biological induction of epidermoid carcinoma in rat lung, 375
evaluation of *in vitro* test in cancer chemotherapy, 807
genetic methods, transplantation of variant tumors in hybrid mice to detect loss of antigens, 1069, 1095
histochemical, distribution of lung carcinomas by, 1227
photometric, measurements on fluorochrome stained cells, 311
Teratoma *see* Ovarian tumors
Testis *see* Survival rates
Testosterone *see also* Hormones
derivatives, effect on mammary tumors induced by methylcholanthrene, 1173
Therapy, surgery in mammary cancer, simple or radical, 1197
Thymus:
incidence of leukemia in mice with intrasplenic thymic transplants, 299
transplantation to spleen, 277
Thyroid gland *see* Mortality rates; Survival rates

Tissue culture:
chromosome changes in, 514
effect of types of serums on human cells in, 1
flank-organ epithelioma of hamster, effect of hormones on, in, 1493
β-glucuronidase activities of cultured cells derived from C3H mouse liver, 667
growth of hepatitis virus in, 29
hyaluronic acid and hyaluronidase production in, 543
leukemic cells of X-ray and viral-induced murine leukemia, 1153
lymph-node cells, lysis of homologous cells *in vitro*, 471
organ, of skin, effect of cortisone on, 1285
polyoma virus in mouse embryo cells, 99
production of viable single cell suspensions from solid tumors, 841
radiation response of HeLa cells in, 1393
Tongue *see also* Survival rates
survival experience of patients with cancer of, 1950–57, NCI Monogr. No. 6, 85

Tracer studies:
aminofluorenols as urinary metabolites of *N*-2-fluorenylacetamide, 145
carbon-14-labeled, glucose metabolism of Rous sarcoma virus-induced tumors, 863
potassium 42 (K^{42}) and rubidium 86 (Rb^{86}), indirect measurement of blood flow in tumors, 1465
protein-binding of *N*-2-fluorenylacetamide and related compounds, 153
Transplantation *see also* Grafts
homograft tolerance in radiation chimeras, 1059
intrasplenic, of neonatal thymus, 277, 299
a method for growing "tissue-isolated" tumors in laboratory animals, 679
tumor variants in determining isoantigenic variants, 1069, 1095
of tumors,
alteration of rat tumor by heparin, 17
induction of tolerance in parous females, 409
lung, and their metastases in mice, 1311
in Syrian golden hamster, 1323

Transplantation—Continued
use of "tissue-isolated" tumors in studies of blood flow, 1465
Tryptophan, pyrrolase activity, substrate induction of, in rat liver, effect of azo-dye carcinogens on, 1503
Tumor(s) *see also* Names of
muscle, immunohistochemical studies, 937
production of hyaluronidase by Walker tumor 256 in tissue culture, 543
transplantable, of Syrian golden hamster, 1323

Uterine cervix and corpus *see* Survival rates; Cervix
Urethan:
failure of bone marrow to interfere with augmentation of X-ray leukemogenesis, 1361
lung tumors in mice induced by, 203
Urinary organs *see* Mortality rates
Uterus, NOS, cancer of *see also* Survival rates
deaths among 5-year survivors, 239

Virus *see also* Mammary-tumor agent
H–1, electron microscopic study of, in injected cells of hamster, 1405
hepatitis in tissue culture, 29
-like particles in lymphoid tumors, 747
Virus—Continued
polyoma, light, phase, and fluorescence microscopy of, 99
rat, intranuclear inclusions in *Rattus* (Mastomys) *natalensis* infected with, 1217
of rats with intranuclear inclusions, *in vivo* and *in vitro* studies, 221
Rous sarcoma,
carbohydrate metabolic enzymes, in tumor induced by, 869
glucose metabolism of, 597
alternate pathways, 863
inheritance of resistance to, 655
Theiler's, in ependymoma tissue culture, virus-like bodies seen by electron microscopy, 793

Walker carcinosarcoma 256, intracellular localization of hematoporphyrin in, 1369

X-ray (roentgen) irradiation:
effects of,
alterations of, with autologous and homologous bone marrow transplantation in monkeys, 53
morphologic, in monkeys, 67
on rat liver, restoration of mass after partial hepatectomy, 131
response of HeLa cells to, 1393
